Art Unit: 3653

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11 are, drawn to *combination of a food display with a utensil dispenser**, classified in class **221*, subclass *199**.
 - II. Claims 22-26 are***, drawn to *a subcombination of a utensil dispenser**, classified in class *221**, subclass *71.**.
2. Inventions of group I and of group II*** are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because *the particulars of an attachment device in the subcombination is not recited in claims 1-11 to the combination.**. The subcombination has separate utility such as *the utensil dispenser could be used either alone or with any other food vending apparatus and not with a food display device. .
3. **. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Claims 12-21,27-39 would be examined along with the elected invention because the claims (12-21,27-39) recite the particulars of the attachment or the coupling device for the utensil dispenser.
